IN THE CLAIMS

Cancel claims 5-12 and amend claims 1-4 by rewriting them as follows:

--1. (Amended) An audio equipment for processing an audio signal and a video signal receiver connected thereto, comprising:

a control panel for the audio equipment, the control panel having a plurality of control portions arranged in a predetermined physical layout;

means for detecting an operated state of each of the portions of [a] the control panel; and

means for producing a video signal to display an image simulating the physical layout of the control panel on the video signal receiver;

the arrangement being such that when the control panel is operated to change an operated state of one of the portions thereof, a video signal is produced in which the display at a position corresponding to [a] the portion of the [displayed image] control panel which is detected as being operated on [the control panel] is varied.

--2. (Amended) A method of displaying operation of an audio equipment, comprising the steps of

providing a control panel for the audio equipment, the

control panel having a plurality of control portions arranged in a predetermined physical layout;

detecting an operated state of a portion of the control panel [of the audio equipment,];

simulating the physical layout of the control panel by forming an image on a video signal receiver; and

varying an image of [an] the operated portion of [an image simulating] the control panel.

--3. (Amended) an audio equipment for processing an audio signal and a video signal for a video signal receiver connected thereto, comprising:

means for selecting and outputting signals from input terminals; and

means for storing the names of devices connected to said input terminals and producing a video signal to display a list of the input terminals and corresponding names of the devices;

the arrangement being such that when one of the signals from the input terminals is selected, a video signal is produced in which the display at a position corresponding to the selected input terminal is varied on the displayed list.

--4. (Amended) A method of displaying operation of an audio equipment, comprising the steps of:

producing an image to display input terminals and the names
